## RESEARCH PROFILE

---

Prof. Akintola Shehu Latunji is a transdisciplinary freshwater and coastal fisheries scientist with a strong background in fisheries biology and ecology, fisheries economics, and fisheries governance and management. The overarching objective of his research is ultimately the well-being of humans, fisheries biomes (environment), and fisheries communities. Conceptually, his work is informed by scholarship in social-ecological systems, sustainability science, and development. He works closely with fisheries scientists, socio-economists, and transdisciplinary scholars in global networks, moving the focus of his work from the national to the global domain to improve the wellbeing of fisheries communities and consumers of fish and fisheries products. Methodologically, he engages in both primary and secondary research, combining quantitative and qualitative analysis.

## EDUCATION

---

2004–2007

**Ph.D in Fisheries Ecology**

Lagos State University, Ojo, Lagos, Nigeria

2001–2003

**M.Sc in Fisheries**

Lagos State University, Ojo, Lagos, Nigeria

1998–2000

**MBA in Marketing**

Ladoke Akintola University of Technology, Ogbomoso, Nigeria

1989–1995

**B. Agric. Tech in Fisheries and Wildlife**

Federal University of Technology, Akure, Nigeria

## ACADEMIC POSITIONS

---

2022–Present

**Dean, Faculty of Science**

Lagos State University, Ojo

2018–2021

**Head of Department, Fisheries**

Lagos State University, Ojo

2009–Present

**Professor of Fisheries**

Department of Fisheries, Lagos State University

2019–Present

**Deputy Director (Science), ACE-ITSE**

Africa Centre of Excellence for Innovative & Transformative STEM Education, LASU

2015–Present

**National Coordinator**

Too Big To Ignore (TBTI) — Global SSF Research Network

2020–Present

**National Coordinator**

Vulnerability to Viability (V2V) Global Partnership

## PROFESSIONAL CERTIFICATIONS

## RESEARCH IN PROGRESS

---

### **Mapping and Evaluation of Woods Used in Fish Smoking and Analyses of Chemical Hazard in Smoked Fish in Nigeria**

**Objectives:** (1) Verify different fuelwood species/types used for fish smoking in Nigeria. (2) Determine the concentration and characterise chemical hazards in fuelwood. (3) Evaluate hazards consumers face in consumption of smoked fish. (4) Study the health hazards by feeding experimental rats.

**Expected Outcomes:** Profile of conventional and unconventional fuelwood used for fish smoking in Nigeria; concentrations of PAH types and levels in fuelwoods and smoked fish; dietary exposure risk assessment; specific impact on human organs from consumption of smoked fish products with high PAH levels.

**Contribution:** This research will influence policy on fuelwood for fish smoking, dietary choices, and general health policy in Nigeria.

## EXTRA-CURRICULAR ACTIVITIES & SERVICE
